

Demographics – Field definition

Employee ID

Technical Name: Employee ID / NIP / Person ID

Description: Unique identifier of the employee included in the demographics dataset.

Grain: Employee

Sensitivity: High

Usage Notes:

Primary key for headcount and employee-based measures. Should be used for distinct counts instead of employee name to avoid duplication issues.

Employee Name

Technical Name: Employee Name / Name

Description: Full name of the employee.

Grain: Employee

Sensitivity: Very High

Usage Notes:

Useful only for restricted drill-through or validation tables. Should not be exposed in executive dashboard views unless access is controlled.

Type of Employee

Technical Name: Type of Employee

Description: Classification of the employee according to their role type.

Expected Values: Operator, Administrator

Grain: Employee

Usage Notes:

Used to segment the workforce between operational and administrative employees. Useful for analyzing demographic composition, tenure, age, and gender distribution by employee type.

Gender

Technical Name: Gender

Description: Gender classification of the employee.

Expected Values: Male, Female / M, F

Grain: Employee

Sensitivity: Medium / High

Usage Notes:

Used for gender distribution metrics such as % Men and % Women. Should be analyzed in aggregate, not as an individual-level identifier.

Employee Position Type

Technical Name: Permanent Position / Contract Type / Position Type

Description: Indicates whether the employee holds a permanent position or another type of employment arrangement.

Expected Values: Permanent, Temporary, Contract, Other

Grain: Employee

Usage Notes:

Used to calculate the percentage of employees in permanent positions. This field is important for workforce stability analysis.

Date of Entry to Alfa / Sigma

Technical Name: Date of Entry to Alfa / Sigma

Description: Date when the employee entered Alfa / Sigma

Grain: Employee

Sensitivity: High

Usage Notes:

This field is used as the base date to calculate employee tenure within Alfa / Sigma. It supports analysis of workforce experience, seniority, retention, and tenure segmentation, such as employees with 0–1 years, 1–3 years, 3–5 years, or 5+ years of service. Since it is employee-level information, it should be handled carefully due to its sensitivity.

Date of Birth

Technical Name: Date of Birth

Description: Employee birth date.

Grain: Employee

Sensitivity: High

Usage Notes:

Should not be used directly in dashboard visuals. It should only be used to derive employee age. For privacy, executive views should show age bands or average age rather than individual birth dates.

Demographics Dashboard – Measurement description

Median Employee Tenure

- **Technical Name:** Median Employee Tenure
- **Description:** Median number of years employees have been employed by the company. Represents the “typical” employee tenure, minimizing the impact of very short or very long tenures.
- **Granularity:** Employee (aggregated to any reporting level)
- **Usage Notes:**
 - Preferred over average when tenure distribution is skewed
 - Best used alongside *Average Employee Tenure*
 - Calculated over current active employees only

Median Age

- **Technical Name:** Median Age
- **Description:** Median age of employees in years, based on **date of birth**.
- **Granularity:** Employee (aggregated)
- **Usage Notes:**
 - Reduces distortion from outliers
 - Useful indicator of workforce maturity
 - Should be presented only in aggregated form (privacy-safe)

Mean Age

- **Technical Name:** Mean Age
- **Description:** Average age of employees in years.
- **Granularity:** Employee (aggregated)
- **Usage Notes:**
 - Sensitive to outliers (very young or very old employees)
 - Best interpreted together with Median Age

Headcount

- **Technical Name:** Headcount
- **Description:** Total number of active employees, calculated using a distinct employee key.
- **Granularity:** Employee
- **Usage Notes:**
 - Foundational metric for all People Analytics reporting
 - Serves as denominator for all headcount-based percentages
 - Must remain consistent across the entire reporting layer

Headcount Unknown (Job Type)

- **Technical Name:** Headcount Unknown (Job Type)
- **Description:** Number of employees whose employment type is missing, unknown, or unclassified.
- **Granularity:** Employee
- **Usage Notes:**
 - Data quality indicator
 - Included to ensure totals reconcile
 - Should not be excluded from total headcount

Headcount Part Time (Job Type)

- **Technical Name:** Headcount Part Time
- **Description:** Number of employees classified as part-time.
- **Granularity:** Employee
- **Usage Notes:**
 - Used to understand workforce flexibility
 - Often paired with Full-Time Headcount and ratios

Headcount Not Specified (Gender)

- **Technical Name:** Headcount Gender Not Specified

- **Description:** Number of employees whose gender is missing or not specified.
- **Granularity:** Employee
- **Usage Notes:**
 - Important for transparency in gender reporting
 - Should always be visible to avoid misinterpretation of gender percentages

Headcount Male

- **Technical Name:** Headcount Male
- **Description:** Number of employees identified as male.
- **Granularity:** Employee
- **Usage Notes:**
 - Used for descriptive gender distribution only
 - Not intended for performance or outcome comparisons

Headcount Full Time (Job Type)

- **Technical Name:** Headcount Full Time
- **Description:** Number of employees classified as full-time.
- **Granularity:** Employee
- **Usage Notes:**
 - Core indicator of workforce stability
 - Commonly used in executive summaries

Headcount Female

- **Technical Name:** Headcount Female
- **Description:** Number of employees identified as female.
- **Granularity:** Employee
- **Usage Notes:**
 - Used in aggregated gender distribution visuals
 - Should be interpreted alongside “Not Specified”

Headcount Eventual (Job Type)

- **Technical Name:** Headcount Eventual
- **Description:** Number of employees classified as eventual or temporary.
- **Granularity:** Employee
- **Usage Notes:**
 - Indicates contingent or non-permanent workforce
 - Often relevant for workforce planning discussions

% Headcount

- **Technical Name:** % Headcount
- **Description:** Proportion of headcount relative to the total headcount within the current filter context.
- **Granularity:** Derived (Headcount-based)
- **Usage Notes:**
 - Generic percentage measure
 - Used across dimensions such as gender, job type, department, or region
 - Always sums to 100% within a visual context

% Headcount Unknown (Job Type)

- **Technical Name:** % Headcount Unknown (Job Type)
- **Description:** Percentage of employees with unknown or unclassified job type.
- **Granularity:** Derived
- **Usage Notes:**
 - Data quality monitoring metric
 - High values indicate upstream data issues

% Headcount Part Time (Job Type)

- **Technical Name:** % Headcount Part Time
- **Description:** Percentage of employees classified as part-time.
- **Granularity:** Derived

- **Usage Notes:**
 - Used to assess workforce composition
 - Sensitive to organizational structure differences

% Headcount Not Specified (Gender)

- **Technical Name:** % Headcount Gender Not Specified
- **Description:** Percentage of employees with gender not specified.
- **Granularity:** Derived
- **Usage Notes:**
 - Important transparency metric
 - Prevents misleading gender balance interpretation

% Headcount Male

- **Technical Name:** % Headcount Male
- **Description:** Percentage of employees identified as male.
- **Granularity:** Derived
- **Usage Notes:**
 - Descriptive metric only
 - Best shown in 100% stacked visuals

% Headcount Female

- **Technical Name:** % Headcount Female
- **Description:** Percentage of employees identified as female.
- **Granularity:** Derived
- **Usage Notes:**
 - Complements % Headcount Male and Not Specified
 - Avoid presenting without full gender context

% Headcount Full Time (Job Type)

- **Technical Name:** % Headcount Full Time
- **Description:** Percentage of employees classified as full-time.

- **Granularity:** Derived
- **Usage Notes:**
 - Common executive KPI
 - Often interpreted as workforce stability indicator

% Headcount Eventual (Job Type)

- **Technical Name:** % Headcount Eventual
- **Description:** Percentage of employees classified as eventual or temporary.
- **Granularity:** Derived
- **Usage Notes:**
 - Highlights reliance on non-permanent workforce
 - Should always be read alongside absolute headcount

Headcount Tenure 5+

- **Technical Name:** Headcount Tenure 5+
- **Description:** Number of employees with five or more years of tenure in the company.
- **Granularity:** Employee
- **Usage Notes:**
 - Indicates experienced and long-tenured workforce segment
 - Often used as a proxy for organizational knowledge retention
 - Should be interpreted alongside total headcount and tenure distribution

Headcount Tenure < 1 Year

- **Technical Name:** Headcount Tenure < 1 Year
- **Description:** Number of employees with less than one year of tenure in the company.
- **Granularity:** Employee
- **Usage Notes:**
 - Represents recently hired employees

- Useful for understanding onboarding load and early-tenure concentration
- Not a measure of attrition by itself

Headcount Age 55+

- **Technical Name:** Headcount Age 55+
- **Description:** Number of employees aged 55 years or older.
- **Granularity:** Employee
- **Usage Notes:**
 - Used for high-level workforce age structure analysis
 - Relevant for succession planning discussions
 - Must always be presented in aggregated form (privacy-aware)

% Headcount Tenure 5+

- **Technical Name:** % Headcount Tenure 5+
- **Description:** Percentage of employees with five or more years of tenure relative to total headcount within the current filter context.
- **Granularity:** Derived (Headcount-based)
- **Usage Notes:**
 - Executive-friendly indicator of workforce stability
 - Sensitive to changes in hiring and attrition patterns
 - Should be read together with average and median tenure

% Headcount Tenure < 1 Year

- **Technical Name:** % Headcount Tenure < 1 Year
- **Description:** Percentage of employees with less than one year of tenure relative to total headcount.
- **Granularity:** Derived
- **Usage Notes:**
 - Highlights workforce renewal and recent hiring intensity
 - High values may indicate growth or high turnover, depending on context

- Requires careful interpretation without historical movement data

% Headcount Age 55+

- **Technical Name:** % Headcount Age 55+
- **Description:** Percentage of employees aged 55 years or older relative to total headcount.
- **Granularity:** Derived
- **Usage Notes:**
 - Descriptive indicator of workforce age composition
 - Useful for long-term workforce planning conversations
 - Not intended for individual-level or performance evaluation
